Pocket Comet Teapots Brand guide

A demo guide for Pocket Comet Teapots, a fictional brand used to show the Brand Hub engine. In a real brand hub, this file is the brand's own guide.

Logo use

Keep clear space around the logo

Leave space on every side of the logo equal to the height of the comet head. Nothing else sits inside that space. Use the reversed logo on Ink or Comet Green. Use the full color logo on Kiln White or white.

Do

- Use the file that matches the background
- Scale the logo from the corner so it keeps its shape

Don't

- Stretch, rotate, or recolor the logo
- Place the full color logo on a dark photo

Color use

Use Comet Green for one action per screen

Comet Green marks the single most important action on a screen. Everything else uses Ink, Slate, Kiln White, and the background colors.

Do

- Use Comet Green for the main button
- Set text on Comet Green in Kiln White

Don't

- Color two buttons green on the same screen
- Use Comet Green for body text

Backgrounds

Use Kiln White for pages, Mist and Clay for panels

Kiln White is the page background. Mist and Clay set a panel or section apart. Use one panel color per page. Set text on these backgrounds in Ink or Slate.

Do

- Use Mist for a highlighted section
- Use Clay for seasonal and gift panels

Don't

- Put Mist and Clay panels next to each other
- Set Slate text on Comet Green

Type

Fraunces for headings, Inter for everything else

Set page titles and section headings in Fraunces at weight 500. Set body text, labels, and buttons in Inter. Use 600 for emphasis in either family. Do not use other weights.

Do

- Keep headings short so Fraunces stays readable
- Use Inter for numbers in tables

Don't

- Set body text in Fraunces
- Use more than two weights on one page

Icons

Use icons from the library at 16px or larger

The icon library uses Bootstrap Icons, drawn on a 16px grid with filled shapes. Use them at 16, 24, or 32 pixels so the lines stay sharp. Color icons with Ink, Comet Green, or Copper. Pair an icon with a text label unless the meaning is universal, like Search or Close.

Do

- Use the pinned icons for common actions
- Download SVG for print and slides

Don't

- Mix icons from other libraries
- Stretch or outline an icon

Photography

Photograph in natural light

Photos show real teapots in use, lit by daylight. Keep backgrounds plain and colors true to life.

Do

- Shoot near a window
- Keep steam and pouring in frame when it tells the story

Don't

- Add filters or color grading
- Use stock photos of tea we do not make

Headshots

Take headshots against Kiln White

Headshots are shoulders up, centered, against a plain Kiln White wall, in daylight. Export at 1200 by 1200 pixels.

Do

- Face the camera with eyes level with the lens
- Crop to a square

Don't

- Use a busy background
- Use photos older than two years

Templates

Keep template text in Inter

Templates set all text in Inter. Change words and photos, not fonts, colors, or layout.

Do

- Replace sample text with your own
- Keep the logo where the template places it

Don't

- Change the font
- Move the logo out of its clear space
